Thanks Linda. We were anticipating all of these topics with the exception of wild rice. However we are always ready and eager to talk wild rice☺.

Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy however Glenn and Shannon will cover the agenda topics identified. Have a good conversation!

Subject: Tomorrow's Joint Evaluation Call with MPCA and EPA

Kristen Faulhaber sent out the agenda and I don't know what I was thinking for suggesting so many agenda items. Sorry about that. MPCA has great monitoring and WQS programs so don't let the list lead you to think otherwise. The WQS items are mainly asking for updates/any barriers or assistance you need from us. For the monitoring, I know we've raised the item before about point source monitoring and metals to get at potential sources of impairment/biological impacts or ruling these out as sources of impairment/biological impacts.

Monitoring

-

Conducting point source monitoring and metals sampling as components of the Intensive Watershed Monitoring program

Water Quality Standards

Tiered aquatic life uses (TALU)/biocriteria

Human health criteria methods

Aquatic life criteria (ammonia, chloride, sulfate)

Wild rice
